

China: 70-city average primary property price edged up sequentially in September

Bottom line:

The National Bureau of Statistics' 70-city house price data suggest the weighted average property price in the primary market edged up by 0.3% mom annualized in September after seasonal adjustments, turning positive for the first time since April 2023. However, the improvement remained narrow based. Home prices in Tier-1 cities continued to rise sequentially, led by Guangzhou. Home prices in Tier-2 cities increased by 1.3% mom annualized, but the sequential decline in Tier-3 cities widened. We emphasize that the 70-city data are for primary market transactions (new home sales) only; secondary market data from NBS and some third-party platforms suggest price declines of 5-8% over the past year.

Key numbers:¹

NBS's 70-city primary-market weighted average property price change in September: 0.3% mom annualized (seasonally adjusted by GS), -2.7% yoy. August: -0.5% mom annualized, -3.0% yoy.

NBS' 70-city secondary-market weighted average property price change in September: -1.7% mom annualized (seasonally adjusted by GS), -4.3% yoy. August: -1.5% mom annualized, -4.8% yoy.

Main points:

1. After seasonal adjustments, weighted average house prices in the primary market edged up by 0.3% mom annualized in September (vs. -0.5% in August; [Exhibit 1](#)). The number of cities that experienced sequentially higher property prices increased in both primary and secondary markets in September, although the improvement remained narrow based ([Exhibit 2](#)). The year-over-year decline in the national weighted average new home prices also narrowed in September (-2.7% in September vs. -3.0% in August), with Shanghai (2.8%), Hangzhou (1.8%), Shenyang (0.5%), and Hefei (0.4%) posting year-over-year price gains in each of the past three months. We emphasize that new home prices in China tend to have lower volatility due to local government price management. Weighted average house prices in the secondary market fell by 1.7% mom annualized in September (vs. -1.5% in August; [Exhibit 3](#)). Secondary market prices from NBS and some third-party platforms suggest price declines of 5-8% over the past year ([Exhibit 4](#)).

¹ Our estimates of 70-city weighted average property price changes are population-weighted, which can differ from simple averages. Sequential change numbers here are based on GS seasonal adjustments.

2. By city tier², Tier-1 house prices rose 2.6% mom annualized in September, accelerating from 2.3% in August, with Guangzhou leading the gains among Tier-1 cities. In Tier-2 cities, home prices increased 1.3% mom annualized (vs. -0.2% in August). However, Tier-3 home prices continued to decline at the same pace as in August, falling 2.0% mom annualized. We continue to expect broad measures of Tier-1 and Tier-2 housing prices to stabilize within the next 1–2 years, likely led by Shenzhen and Shanghai.
3. Our high-frequency tracker suggests that 30-city new home transaction volume was below year-ago levels in early October, though the comparison was likely distorted by the slight timing difference of the National Day Golden Week holiday relative to last year. Major cities' inventory months (sellable gross floor area divided by 12-month rolling gross floor area sold) remained at 27.2 in September, as an increase in Tier-2 cities was offset by a decline in Tier-1 cities.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is focused on investment themes across markets, industries and sectors. It does not attempt to distinguish between the prospects or performance of, or provide analysis of, individual companies within any industry or sector we describe.

Any trading recommendation in this research relating to an equity or credit security or securities within an industry or sector is reflective of the investment theme being discussed and is not a recommendation of any such security in isolation.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g.,

marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.
